REGISTRY AND RETURNS
OF
BIRTHS, MARRIAGES AND DEATHS
IN
MASSACHUSETTS.

SIXTH

ANNUAL REPORT

TO THE LEGISLATURE,

RELATING TO THE

REGISTRY AND RETURNS

OF

BIRTHS, MARRIAGES AND DEATHS

IN MASSACHUSETTS.

FOR THE YEAR ENDING APRIL 30TH, 1847.

BY JOHN G. PALFREY,

SECRETARY OF THE COMMONWEALTH.

Boston:

DUTTON AND WENTWORTH, STATE PRINTERS,
NO. 37, CONGRESS STREET.
1847.

Commonwealth of Massachusetts.

SECRETARY'S OFFICE, BOSTON;

November 13, 1847.

*To the Honorable Senate
and House of Representatives :*

I have the honor to report the following statement and tabular results of the Registry and Returns of Births, Marriages and Deaths, for the registration year, ending April 30th, 1847.

The number of the Births, Marriages and Deaths returned from the several towns is, in the first place, exhibited in full, with the population of the towns according to the census of 1840, and a recapitulation of the same classes of facts, summed up according to counties (pp. 3—11). In another column, for purposes of comparison, are given the returns of the two preceding years. The last returns of Births, Marriages and Deaths are more full than those of either of the previous years. The number of Births returned, is as 1 to 34 inhabitants (according to the census of 1840), excluding the population of Boston; the number of Marriages, as 1 to 114, and of Deaths, as 1 to 54. The returns of births from Bradford and Rockport, in Essex county, were made too late to be incorporated into the tables; as they were received before the printing was begun, they are entered in their place on page 3. Returns of 11 births and 1 marriage were received this day from Norwich, in Hampshire county.

Extracts from the communications of the town-clerks are presented, as heretofore, in the body of notes appended to the synopsis of returns (pp. 12—21). The towns which failed to make returns are specified at the end of the notes, under the heads of the several counties.

The town-clerks have sometimes returned the names of inhabitants, whose deaths have taken place elsewhere. When the

death is represented to have occurred in some other town of the Commonwealth, the entry has been transferred to that town; when elsewhere, it has been omitted, except cases of death at sea, or in a foreign port.

Table I, in two parts, relates to Births. The first part (p. 22) exhibits the number of male and female children, and of those whose sex is not reported, born respectively in the several months and in the several counties. The second part (p. 23) exhibits the cases of more than one child at a birth, arranged under the heads of months, counties, and sex.

Table II, in two parts, relates to Marriages. The first part (p. 24) records the number of marriages solemnized, in each month, in each county of the Commonwealth. The second part (pp. 25—27) records the facts important to be observed in statistical tables, in relation to the ages and conditions of parties to marriage.

Tables III, IV and V relate to Deaths.

Table III, in four parts, records the causes of death. In the first part (pp. 28—35), against the names of the respective diseases, alphabetically arranged, is recorded the number of persons who died of the same during the year, with a specification of the sex, proximate age, month of decease, and place of birth, so far as to distinguish between natives of the American town where they died, other Americans, and foreigners. The second part (pp. 36—39), against the names of the diseases, scientifically arranged, presents the number of deaths therefrom in the several counties.

The third part of Table III (pp. 42—45) presents a synopsis of the number of deaths from each disease, or other cause, which took place, according to the returns, in 1847, and the two preceding years respectively. The proportion of the number of each class, in each year, to the number of 10,000, is carried out in three other columns, affording the means of a perfect comparison of the proportional mortality from different causes, so far as the returns furnish the requisite materials. The fourth part of the same table (p. 46), under the heads of the respective counties, exhibits the returns of stillborn children, with a specification of the sex.

Table IV (pp. 47—50), designed to illustrate the influence of occupation on longevity, exhibits the number, and average age at the time of death, of persons engaged respectively in the different employments of life, as shown by the returns of 1847, and the two preceding years.

Table V (p. 51), designed to furnish some illustration of the influence of domestic condition on longevity, exhibits, against each county, an abstract of the returns of the number, sex, and age of persons deceased in the last registration year, under the divisions of single, married, and widowed.

Which is respectfully submitted by

JOHN G. PALFREY, *Secretary*.

REGISTRATION

OF

BIRTHS, MARRIAGES AND DEATHS

IN

MASSACHUSETTS.

BIRTHS, MARRIAGES AND DEATHS,

*Returned to the Secretary's Office, for the three years ending April
30th, 1845, 1846, and 1847.*

NOTES.

SOME of the returns were accompanied with remarks by the town clerks. From these, the following notes have been compiled with a view to show the condition of registration through the State, the practical operation of existing laws on the subject, and the views of the town clerks in regard to amendments.

SUFFOLK COUNTY.

CHELSEA.—*Marriages*. "I presume there has been quite a number which have not been returned to this office."

No RETURN of births, marriages or deaths from *Boston*; and of births or deaths from *North Chelsea*.

ESSEX COUNTY.

AMESBURY.—*Births*. "These returns were made by the school committee, and are probably correct."

BEVERLY.—"Although these returns are not now what they might be made if all did their duty, yet they are more complete than any previously forwarded from here, and I think that the arrangements which I have made for the future will hereafter secure you pretty accurate returns, always excepting the marriages, so long as clergymen are to be depended upon to collect and furnish the particulars."

BRADFORD.—*Births*. "The school committee made no return." [Return of births not received in time to be included in the tables.]

NEWBURY.—*Births*. "I have delayed till almost the last hour allowed to make my return, with the hope and expectation that our school committee would perform the part obligatory on them; but I have waited in vain, or nearly so, as only two of the board have taken any interest in obtaining the number of births in the town for the year ending May 1, 1847. My return, therefore, is imperfect, which I very much regret. I think, at least, there must have been, within the time specified, from sixty to seventy, whilst I am only able to return *forty-one*."

ROCKPORT.—*Marriages*. "Clergymen have been prompt and faithful in making their returns."—*Deaths*. "Much attention has been paid to the return, to make it (as it is believed to be) quite correct. The causes of death have not been put down at random, but the several practising physicians of the town have been frequently consulted, each of whom has kindly and patiently rendered all required

information. One of the sextons, also, has faithfully performed his duty." [Returns received too late to be included in the tables.]

SAUGUS.—"If the Legislature would so change the law as to make it one person's duty to do the business, and pay him for it, I think it would be better done."

NO RETURN from *Wenham*; and of births from *Haverhill*.

MIDDLESEX COUNTY.

ACTON.—"The returns are not made in full to me."

ASHEY.—*Births*. "The school committee have not taken any pains to ascertain the number the past year."

ASHLAND.—*Deaths*. "I suppose the whole number in the town during the year."

CAMBRIDGE.—*Births*. "More full than some which have preceded it. As our city contains nearly fifteen thousand inhabitants, I think the whole number of births has exceeded five hundred during the year; one of our principal physicians says 'at least six hundred.'"—*Marriages*. "The return is very imperfect, embracing less than half the marriages which have probably been solemnized in Cambridge during the last year. In that period, one hundred and seventy-three certificates of publishment were issued from this office, in one hundred and twenty-nine of which the female party was of Cambridge. Of this number, only fifty-two are here returned, the other ten marriages being of persons not here published, neither of the parties residing in this city. Rev. Mr. ———, of the catholic church, who probably solemnizes more marriages than any other one individual in Cambridge, has never made a return to this office. Rev. Mr. ———, of one of the unitarian churches, has made no return since his settlement in Cambridge, some fourteen or fifteen years. So long as clergymen disregard the law and make imperfect returns, or none, it is idle to hope for accuracy or fullness in the general annual return to your office."—*Deaths*. "The return embraces nearly all which have occurred during the year. In some respects, it is imperfect, but it is the best which the materials within my reach enable me to make."

CONCORD.—*Births*. "I have not received the returns from the school committee."

GROTON.—*Births*. "Not all returned by the school committee."—*Marriages* and *Deaths*. "Accurate and complete."

HOLLISTON.—"This law is getting into favor as its operation is seen."—*Births*. "I think this return correct, or very nearly so. Five cents each is quite too small a fee to get this work of collecting births done correctly."—*Marriages*. "I have used your certificates for the last few months, and clergymen like the plan, as our filling the blanks relieves them of one very unpleasant part of their duty. I think our fee too small for this; one can afford to pay a dollar if he gets a good wife, and I certainly would charge him nothing in any different state of the case. I think the return is nearly correct. The proper officers are yearly using more efforts to perform their duty, and I think by the next, they may be perfect, if indeed they are not so already. I think the registration law a good one, deducting

a few small imperfections, and hope it may be carried into effect to its full extent.”—*Deaths*. “This return is believed to be correct; but I think if one person should collect all the births and deaths, and have a fair compensation allowed him, the returns would be more perfect; the compensation is so small, that obedience to the law and the importance of the matter are the chief incentives to the work, and the best reason why they are obtained so well as they are.”

LEXINGTON.—*Deaths*. “The return is not correct, in consequence of the death of one of the sextons, and from whom no return has been received.”

LINCOLN.—*Marriages*. “All that have been returned.”

LOWELL.—*Marriages*. “The list is believed to be complete.”

NATICK.—“When I made the last annual return of births, marriages and deaths in this town, I thought I had reason to believe that our next return would be more perfect; in that hope I have been wofully disappointed. No return has ever been so meagre. I have used every reasonable means in my power, without resorting to physical force, to accomplish an object so much desired as a correct return, but all to no purpose. The law is a dead letter.” “I believe the town clerks discharge the duties of their office with as strict fidelity as any grade of officers in the Commonwealth; but the Legislature has seen fit to impose a fine of ten dollars for neglect of duty in making their returns, while all other persons, whose duty is much less onerous, go free.”

NEWTON.—*Births*. “Probably above one hundred in reality.”

TYNGSBOROUGH.—*Marriages*. “Most of our people go to Nashua, N. H., where they are married without being published.”—*Deaths*. “The sexton has never made a return of deaths; the minutes for the return were obtained by going to the sexton and copying from his book (very imperfectly kept), and by information received from friends of the deceased, when particularly called on by me.”

WESTFORD.—*Deaths*. “I am unable to make an accurate return, although I have distributed blanks and requested that they should be filled up and returned to me. The return contains about one half the number which have taken place.”

WOBURN.—“The returns are as perfect as I could possibly make them; I have spent more time, and been to more trouble than any previous year, yet it is not correct.”—*Births*. “It has been impossible for the assessors to ascertain births happening in some families, even upon inquiry of the father or mother; some forget, when called upon for information, that any event of the kind has happened in their families, it being with them an occurrence not at all uncommon; others, I presume, do not wish to have it known that the population of the town is increasing so fast as it actually is. The following will show the number of births returned, and the sources from which the information is derived.” “I am inclined to think that these are all the births that have happened in Woburn for the past year. The fact that only three quarters of the whole number of births are returned to me from proper sources, will give you some idea of the difficulties of making out a full and perfect record. The fault is not owing to the assessors; they do all their duty. I think if the duty of ascertaining births rested with town clerks, or with the prudential district committees rather than the town committees, some of the difficulties which have arisen might be obviated; and make it the duty of fathers to return, to proper persons, all births happening in their families within a limited time, or be subject to a fine; and further make

it the duty of every person appointed to receive such returns to prosecute all violations of the law, or be fined himself.”—*Marriages*. “The whole number of marriages was thirty. The number of intentions of marriage entered with me was fifty-six; nearly one half of those published in town were not married here.”

No RETURNS of births from *Acton, Ashby, Concord, and Stow*; and of deaths from *Framingham, Somerville, and Watertown*.

WORCESTER COUNTY.

AUBURN.—*Marriages*. “Although the number returned is very small, yet it is believed that it is correct. It is accounted for by the fact that a large proportion of persons, intending marriage, make a short tour to Connecticut, and come back, having carried their intentions into effect under the liberal and summary laws of that State.”

BERLIN.—*Marriages*. “Three couple have been married by clergymen out of town, who have not made returns to me.”

BLACKSTONE.—*Births*. “The return is not as accurate as I could wish, but as much so as could be made from the information obtained.”—*Deaths*. “Not accurate in some respects. Many of our population are foreigners, from whom it is almost impossible to obtain information.”

DUDLEY.—“The clergymen are very prompt in making their returns, the sexton rather negligent, and the school committee made no return at all, nor will they, unless there is a penalty in the law, or a greater compensation to induce them.”

HOLDEN.—*Births*. “I believe the return is correct.”—*Marriages*. “I believe the number to be correct.”

NORTHBOROUGH.—*Births*. “The same old difficulty remains yet, about getting the information out of which to make our returns; the return probably embraces less than one half of the births in this town for the year. Only two out of five of the school committee have made any return at all; they were furnished with blanks containing the proper directions for their proceedings, also a request endorsed on them, to be returned on or before the first of June. It would be about as cheap to pay the fine and let the whole business go, as to try to keep the records under present circumstances. There are several deficiencies in the record of deaths, also some in the marriage record.”

OXFORD.—*Births*. “The school committee did not choose to collect any, and did not return any for record. The town clerk for the past year died about the first of February, and he had made no record since the last return; consequently there are none to return, except the few which I have picked up in my vicinity.”—*Deaths*. “I return what occurred after the decease of the former town clerk.”

TEMPLETON.—*Births*. “The return is very imperfect, not containing probably more than one fifth of the whole number in the town. The school committee informed me that they had made arrangements with the assessors to get and make to me a return. I forward all which I obtained from them.”

No RETURNS from *Upton*.

HAMPSHIRE COUNTY.

AMHERST.—*Births*. "Very nearly complete, although obtained at considerable trouble on my own part, for, had it been left to the school committee, it would not have been one third the return as made."—*Marriages*. "All returned."—*Deaths*. "I return all that have come to my knowledge, having received but eight certificates from the sextons. It is impossible for the town clerk to make full returns, with the very little aid he receives; and until the Commonwealth or town are willing to pay sextons and others as much for services as they can earn in sawing wood, they will, on the calculation of loss and gain, take care not to trouble themselves to make reports. As it is here, the clerk must do all, or nearly all, or the work is not done, and the returns must be made very incomplete."

BELCHERTOWN.—"The returns are, in the main, correct, although it has cost me considerable effort to get them."—*Births*. "I have had no return from the school committee, but have registered them as they have come to my knowledge, and from information received of our physicians. There seems to be no interest manifested among parents to have the births of their children registered, and there are therefore, without doubt, a few which I have not returned."—*Marriages and Deaths*. "I believe the returns are correct."

EASTHAMPTON.—*Births*. "The school committee have made no return. I have been waiting for them to make a return; therefore I have not the information that I should have had if it had not been their duty to make a return. I think that if it was made the duty of the town clerk, or some other man, to get the information and make the return, and a reasonable compensation given, the returns would be more perfect than they now are. If you want your returns correct, the less number employed in making them the better. It might be otherwise in cities, but I think that, in the country, if the returns were made wholly by one man, they would be more correct."—*Marriages*. "I return two, which is all that have been solemnized in town. Some have gone out of the State."—*Deaths*. "We have no sextons, which is the case with one half of the towns in the State."

ENFIELD.—*Marriages*.—"All which have taken place; although four couples, not included in the list, have been married out of the Commonwealth."

GREENWICH.—"The return was obtained from the attending physicians; it is not definite."

MIDDLEFIELD.—*Marriages and Deaths*.—"A true copy of the record, and as full as I am able to give."

PELHAM.—*Births and Deaths*. "I have no return or record."

PRESCOTT.—*Marriages*. "There have been twelve couple published the past year, but only one half that number have been married in Prescott, as appears by the return, which I think is correct."

SOUTH HADLEY.—*Births*. "I believe the return to be correct. Several mills were burnt in May, 1846, and, within six months, sixty-five families left town, from whom no return could be obtained, which accounts for the falling off from previous returns."—*Marriages*. "Probably two not returned."—*Deaths*. "The return does not include those in the second parish. I have endeavored to obtain

them, but have not yet succeeded; there were not probably more than three or four in that parish."

WARE.—*Deaths*. "The return is imperfect; probably but about three fourths of the real number."

WILLIAMSBURG.—*Marriages*. "All that have been returned to me, but the whole number is probably ten or twelve."

NO RETURNS from *Norwich*; of births from *Chesterfield* and *Easthampton*; and of births and deaths from *Pelham*.

HAMPDEN COUNTY.

BLANDFORD.—*Marriages*. "All that have been returned to me, but I think not more than two thirds that have taken place."

GRANVILLE.—*Marriages*. "Clergymen fail to make returns to me regularly. I have supplied the record as far as my knowledge allows."—*Deaths*. "For the past year there have been no returns rendered to the town clerk. There is no regular sexton in Granville, although there are eight grave-yards."

PALMER.—*Deaths*. "I as yet have never been able to get any returns of deaths in our place, but we are making arrangements this year so as to get them as nearly as we possibly can."

WEST SPRINGFIELD.—*Births*. "As was the case last year in regard to the return of births, so it is this; not one has been returned to me by the committee. I let them have one set of the blanks you sent me in the spring, and as they have not returned them up to this date, my last day according to law, I think they are blanks still. While I am liable to a fine for not returning the list to you, the school committee do as they please about collecting and sending them to me for record and return."

NO RETURNS of births from *Ludlow* and *West Springfield*; and of deaths from *Granville* and *Palmer*.

FRANKLIN COUNTY.

BERNARDSTON.—*Births*. "The return was prepared by Dr. E. W. Carpenter, one of the most respectable physicians in this town, and is, I believe, perfectly accurate. Dr. Carpenter labors in this matter for the good of the public, and for posterity. Will not every town in our beloved Commonwealth do as well? I trust it will soon be so."—*Marriages*. "This town is situated on the line of the State of Vermont; in that State, persons are married without any previous publication; many persons, therefore, go from this town to Vermont to be married; the number I have no means of knowing, probably four or five couple annually."

COLERAINE.—*Births* and *Marriages*. "The returns are as perfect as could be made from the facts received at this office."

GREENFIELD.—*Births* and *Deaths*. "Never returned to me."—*Marriages*. "All that have been returned to me."

HEATH.—*Births*. "The school committee made their return so incorrectly that I cannot record them."—*Marriages*. "None returned in the form for return to the Secretary's office."—*Deaths*. "All that have been returned to the clerk's office, though but a small part of the whole number."

LEYDEN.—*Births*. “Substantially correct.”—*Marriages*. “All that have taken place.”—*Deaths*. “Full, and substantially correct.”

ORANGE.—*Births*. “The return of the school committee was very imperfect in part of the town, and, so far as I have been able, I have supplied the deficiencies, but many names and dates are still omitted.”

SHUTESBURY.—*Births* and *Deaths*. “No return has been made to me.”

SUNDERLAND.—*Deaths*. “The return is not perfect, but is more so than any former one I have made.”

WARWICK.—*Births*. “A correct return of all that have occurred in town; our school committee have spared no pains in their duty in this matter, and I believe they have been successful in making a very correct return to me.”—*Marriages*. “All that have taken place.”—*Deaths*. “I believe the number is correct.”

NO RETURNS from *Conway*, *Northfield* and *Rowe*; of births and deaths from *Greenfield* and *Shutesbury*; of marriages from *Heath*.

BERKSHIRE COUNTY.

ALFORD.—*Deaths*. “The return is far from being correct, because the town has not complied with the requirements of the act, and chosen a sexton. I have obtained the particulars myself.”

BECKET.—*Births* and *Deaths*. “No returns have been made to me.”

DALTON.—*Marriages* and *Deaths*. “No interest is taken by any one to make returns, or inform the clerk of marriages or deaths. Of the mortality among children, which is greater than usual, I have not been able to obtain the particulars.”

FLORIDA.—*Marriages*. “For the return for this town, I would refer the Secretary to the justices of the peace in the town of Stamford, Vt. The fees and delays consequent on a publication of the banns of matrimony are more than the contracting parties are generally able to bear.”

HANCOCK.—*Marriages*. “People about to marry generally avail themselves of the privilege of going into the State of New York to have the ceremony performed. This is the second year of my serving as town clerk, and I have never been called upon to publish a couple as yet, for the reason as above stated.”

LANESBOROUGH.—*Births*. “The list is as correct and specific as circumstances will admit.”

LEE.—*Births*. “The record is not so full as it ought to be. I have exerted myself, since I came into office, to get as many as possible; but after all, I am satisfied that not half of the number of births is on record. I spoke early to one of the school committee, who well knew his duty, but he has not made a single return.”

NEW ASHFORD.—*Births*. “I believe, all that have taken place. I have obtained them by personal application to the parents.”

PLAINFIELD.—*Births*. “The school committee of Plainfield thinking the compensation for ascertaining and reporting births to the town clerk insufficient, and believing that no penalty is annexed to the neglect, they have ever omitted to do it altogether. I have taken much pains to ascertain the births (although I think the compensation altogether inadequate), yet, probably, I have not returned every

one.”—*Deaths*. “No sexton has ever reported to me a death. I have learnt the deaths, as well as I can, from the clergymen of the place.”

WEST STOCKBRIDGE.—“I have delayed making my returns beyond the time required by law, hoping to be able to make my records more perfect; but I cannot obtain the information.”—*Births* and *Marriages*. “I think the returns are perfect.”—*Deaths*. “I shall never be able to make a perfect record of deaths. I suppose there have been twenty-five or thirty during the last year, but I can return but eleven.”

NO RETURNS from *Cheshire*, *Great Barrington*, and *Sandisfield*; of births and deaths from *Becket*; of deaths from *Dalton* and *Stockbridge*.

NORFOLK COUNTY.

BROOKLINE.—*Births*. “The return is believed to be correct; it was made from inquiry made at each house in town.”—*Marriages*. “All which I have been informed have taken place; but one of the clergymen has made any return.”—*Deaths*. “A correct return.”

COHASSET.—*Deaths*. “As we have no superintendent of burying grounds, and every man employs whom he will to bury his dead, it is with much difficulty that correct information is obtained. I think it should be made the duty of clergymen to fill your certificates and return them to the clerk, and, if five cents won’t induce them to do it, fine them fifty dollars if they don’t.”

MEDWAY.—“The whole number has not been returned; it is hoped that the records next year will be more full.”

ROXBURY.—“The returns are very nearly correct, as much so as is possible, having given a careful attention to the subject myself.”—*Births*. “The returns were taken by a person authorized by the school committee, who went to all the families in the city.”—*Marriages*. “The form of certificate of intention of marriage which I obtained from you I have continued to use, and the blanks have been filled up by me at the time of publishment, thereby saving the trouble and inconvenience to the persons who solemnize the marriage, who are required to do it at that time.”—*Deaths*. “The returns were made by the undertakers, who filled out blanks which I obtained from your office, which I sent to them.”

STOUGHTON.—*Births*. “This return is a most wretched affair, imperfect in numbers, many not being returned at all, and some with only the month the birth took place. It is as returned by the school committee, save some few corrections which occur from my own knowledge.”—*Deaths*. “The return is believed to contain the full number.”

WEYMOUTH.—*Deaths*. “The return is not correct, one of the school committee (to whom I am indebted for the return of deaths) not having made any return, his district comprising from one fifth to one fourth part of the town.”

NO RETURNS from *Braintree*.

BRISTOL COUNTY.

DIGHTON.—*Deaths*. “I suppose there have been more within the last year, but they have not been reported to me in a way which I could record, and I have made personal inquiries for most I have recorded.”

FAIRHAVEN.—*Births*. “The school committee again refuse to do their duty in ascertaining them, consequently there are no returns.”—*Deaths*. “One sexton only has made his return to the clerk’s office.”

NORTON.—*Marriages*. “I have published twenty-one couples ; only eight have been returned, and seven of them by one person. I presume all the persons have been married. I have shown the law to a number of clergymen ; if they have joined any persons in marriage, they have not made any returns to me.”

PAWTUCKET.—*Births*. “I believe the return comprises the whole during the year, and the information is as full and correct as I have been able to obtain, after visiting every family, personally, under the direction of the school committee. My opinion is, that, if it were made the duty of town clerks to collect births and deaths, the returns would be much more complete and satisfactory.”—*Marriages*. “The returns are as near complete as the information supplied to me by clergymen will admit. I hope the next will be more perfect, as I have adopted the plan recommended of getting the information myself, as far as practicable.”—*Deaths*. “The return is very incomplete, owing, mainly, to the sexton’s failure in getting the necessary information ; I have been obliged to collect them mostly by personal inquiries.”

SEEKONK.—*Deaths*. “None returned.”

TAUNTON.—*Births*. “The returns have been faithfully drawn off from the separate records of each member of the school committee.”

NO RETURNS of births from *Fairhaven* ; and of deaths from *Dartmouth* and *Seekonk*.

PLYMOUTH COUNTY.

ABINGTON.—*Births*. “There have probably been some others, concerning which I have not been able to obtain information.”

CARVER.—*Births and Deaths*. “I have received no returns.”

EAST BRIDGEWATER.—*Deaths*. “The returns are incomplete as to number, and in some other respects. There are two sextons, only one of whom has made a return to me.”

HINGHAM.—*Births*. “I have been waiting for a full return, presuming that this does not contain the names of all the children, and have concluded to wait no longer, but return the names of all that I have received.”

MARSHFIELD.—*Births*. “No others have occurred.”—*Marriages*. “All that have taken place, with the exception of one, which has not been returned to me.”—*Deaths*. “No others have occurred.”

PLYMPTON.—The town clerk reports the returns as embracing every birth, marriage and death which has occurred in the town.

NO RETURNS from *Middleborough* ; of births and deaths from *Duxbury* ; and of deaths from *Carver*.

BARNSTABLE COUNTY.

WELLFLEET.—*Marriages*. “All that have been returned to me, but not nearly all that have occurred.”—*Deaths*. “Probably the return contains one third of the number which have occurred. We have three sextons in town, and I have asked

them to keep a list of the deaths in their own parishes, but have received returns but from one; therefore you can see the inexpediency of depending upon them."

YARMOUTH.—*Marriages*. "There have been two or three more, of which no returns have been made at this office."

NO RETURNS from *Dennis* and *Truro*.

DUKES COUNTY.

TISBURY.—*Deaths*. "The return contains the best information I can furnish. We have no sexton to attend to the duty required by law, consequently I have attended to it myself, and have gathered the facts from physicians, and others. There have been six or eight more than I have returned, but, as they have taken place in a remote part of the town, I could not obtain the particulars, except at considerable trouble and expense."

TABLE I. 1. ABSTRACT OF THE RETURNS OF BIRTHS,
in the several Counties, for each month of the year ending April 30, 1847.

Month.	Sex.	COUNTIES.												Total.	
		Essex.	Middlesex.	Worcester.	Hampshire.	Hampden.	Franklin.	Berkshire.	Notfolk.	Bristol.	Plymouth.	Barstable.	Dukes.		Nantucket.

NOTES TO THE ABSTRACTS OF DISEASES.

It has been considered desirable to institute, as far as we can from the returns, a comparison of the prevalence of particular diseases, in the same districts, for different years. Boston having made no returns of deaths for the last four years, the County of Suffolk is excluded in the several abstracts of deaths.

In the Tables for 1847, the Alphabetical Abstract contains the names of the diseases, generally, as they appear in the returns. In the Classified Abstract, they are arranged after the plan of the Registrar General of Births, Marriages and Deaths in England, with some alterations, which circumstances in this country seemed to dictate. They are numbered for the purpose of convenient reference, and each class is arranged alphabetically. The numbers in parentheses, in the following notes, are references to the heads, under which diseases are arranged in the Classified Abstract. Those who may wish for a more particular sub-division of the diseases for 1847, or the age or month of the year in which they occurred, may consult the Alphabetical Abstract.

NOTES—1847.

Zimotic Diseases.—Under Cholera (1) are included 63 cases of Cholera Morbus, and 14 of Bilious Colic. Under Fever Remittent (8) are included 5 cases of Yellow Fever. Under Fever Typhus (9) are included 324 cases of Fever, 76 of Typhoid, 10 of Nervous, 72 of Brain, 15 of Synochus, 12 of Congestive, 5 of Putrid, 3 of Gastric, and 3 of Ship Fever. Under Scarlatina (13) are included 61 cases of Canker, 43 of Canker Rash, 33 of Throat Distemper, 9 of Throat Disease, and 3 of Putrid Sore Throat. Under Small Pox (14) are included 2 cases of Chicken Pox.

Diseases of General or Uncertain Seat.—Under Hemorrhage (23) are included 4 cases of Hæmoptysis, 2 of Hæmatemesis, and 1 of Epistaxis. Under Malformation (26) are included 1 case of Spina Bifida, and 1 of Cyanosis. Under Scrofula (28) are included 1 case of Bronchocele, 2 of King's Evil, 3 of Rickets, and 1 of Humor. Under Sudden Deaths (29) are included 6 Found Dead, 4 by Drinking Cold Water, and 1 of Surfeit. Under Tumor (30) is 1 case of Melanosis.

Diseases of the Nervous System.—Under Apoplexy (31) are included 5 cases of Lethargy. Under Convulsions (34) are included 11 cases of Spasms, and 1 of Catalepsy. Under Tetanus (40) is 1 case of Cramp. Under Brain, &c., Disease of (41) are included 54 cases of Inflammation of the Brain, 6 of Neuralgia, 16 of Congestion of the Brain, and 1 of Phrenitis.

Diseases of the Respiratory Organs.—Under Bronchitis (43) are included 2 cases of Catarrh. Under Consumption (44) are included 13 cases of Phthisis. Under Pneumonia (48) are included 371 cases of Lung Fever, and 53 of Inflammation of the Lungs. Under Lungs, &c., Disease of (50) are included 11 cases of Congestion of the Lungs.

Diseases of the Organs of Circulation.—Under Heart, &c., Disease of (53) are included 11 cases of Anæmia, 5 of Angina Pectoris, and 3 of Ossification of the Cardiac Valves.

Diseases of the Digestive Organs.—Under Colic (55) are included 1 case of Constipation of the Bowels, and 1 of Painters' Colic. Under Enteritis (57) are included 77 cases of Inflammation of the Bowels, and 22 of Bilious Fever. Under Hernia (59) are included 2 cases of Umbilical Rupture. Under Organs, &c., Disease of (65) are included 34 cases of Disease of the Bowels, 10 of Disease of the Stomach, and 1 of Disease of the Tongue. Under Jaundice (68) are included 2 cases of Obstruction of the Gall Ducts.

Diseases of the Urinary Organs.—Under Kidneys, &c., Disease of (75) are included 3 cases of Strangury, and 1 of Disease of the Prostate Gland.

Diseases of the Organs of Generation.—Under Childbirth (76) are included 2 cases of Rupture of the Uterus, and 1 of Abortion. Under Organs, &c., Disease of (79) are included 7 cases of Disease of the Ovaries.

Diseases of the Organs of Locomotion.—Under Joints, &c., Disease of (81) are included 5 cases of Disease of the Bones.

Diseases of the Integumentary System.—Under Ulcers (85) are included 3 cases of Fever Sore. Under Skin, &c., Disease of (87) are included 3 cases of Psoriasis, and 1 of Carbuncle.

Of External Causes.—Under Casualties (90) are included 8 cases of Sun Stroke, 2 of Murder, 2 of Medicine given by Mistake, 1 of Struck by Lightning, 1 Frozen, 1 Overlaid, 1 of Neck broken by diving into water, 1 Wounded, 1 of Fracture of the Spine, and 1 by Cutting a Corn. Under Drowned (92) 72 were lost at sea. Under Intemperance (99) 1 by the excessive use of Opium.

TABLE III. 3. ABSTRACT OF RETURNS OF CAUSES OF DEATHS,

in the three years 1845, 1846 and 1847.

	CAUSES OF DEATH.	1845.	1846.	1847.	To 10,000 Deaths by all Specified Causes, there were in

	14.						
109	Stillborn, . . .	73	109	149	90	125	144

NOTE.

The number of the *stillborn*, in 1847, is stated above to be 149, while in the table on the next page it is 33. The cause of this disagreement is that the first number (149) was abstracted from the returns of the deaths; and the second (33) from the returns of the births. The stillborn should always be fully reported, both among the births and deaths; but, having never lived as separate, independent persons, they should be excluded in numbering the deaths. This has been done in all the calculations in these tables. A deduction of 499, for causes not specified, leaves 10,317 as the number of deaths for specified causes, and this was the basis of the calculations.
